

About Lafarge

Lafarge is Canada's largest provider of diversified construction materials. With 6,000 employees and 400 sites across the country, our mission is to provide construction solutions that build better cities and communities. From cement and aggregates, to ready-mix and precast concrete, paving and construction, we have the ability to bring value to every project. Our products are used in residential, commercial, and public works construction projects.

Aggregates are the most fundamental building blocks in the construction process. Lafarge provides a full line of high-quality aggregate products and services to meet the increasingly sophisticated needs of the construction industry. Our aggregate products are used in building roads, buildings, dams, mass transit, or producing asphalt or concrete. The company has a large network of sites across Canada, so we are local wherever you are.
